

AL-FARABI KAZAKH NATIONAL UNIVERSITY

I entered Kazakh State University in August 2023. When I first saw the university with my own eyes, I was delighted. I was very interested in such a historical university with a long history and a huge area. I entered the Faculty of Mechanics and Mathematics to study mathematics and statistics. I have been studying at this university for about a year now. I'm almost finishing my first course. And this university has given me a lot this year and let me learn a lot. While studying at this university, I learned that mathematics is not an easy subject. By studying mathematics, you begin to think deeply as your brain develops. And if we talk about student life at this university, it is very interesting. This university, unlike other universities, has a lot of organizations. Each organization does its own thing. For example, one of them can organize parties for students, while another can organize competitions to compare the knowledge of faculties.

Based on everything, I can say that if future students go to this university, they will have a wonderful student life.

Әл-Фараби атындағы ҚазҰУ Механика-математика факультеті

Ақтуарлық математика мамандығының 1 курс студенті:

Нурсултанов Алмаз

Филология факультеті шет тілдер кафедрасының аға оқытушысы:

Жубанова Күләш Хорезмовна
