

KazNU is my university

Kazakh National University, commonly referred to as KazNU, is not just an educational institution but a sanctuary of intellectual enlightenment and personal growth. I have been studying at this university for almost a year now. This university gave me a lot of emotions, memories and cool people. I study in one of the most difficult faculties of the university.

Central to KazNU's academic excellence is its distinguished faculty, comprised of seasoned scholars and experts in various fields. Their unwavering dedication to teaching and mentorship has been instrumental in nurturing my intellectual curiosity and fostering a lifelong love for learning. Through their guidance, I have been empowered to explore new horizons, challenge conventional wisdom, and pursue knowledge with passion and conviction.

KAZNU is a great university with a very long history. I consider my university the best and understand that I need to be a qualified professional in my field. Truly our university is the best of the best. The whole campus and all the amenities for students. There are many different organizations and projects where every student can try their hand at it. I am also a member of one of the organizations. Another favourite thing about studying at Kaznu is the beautiful view of the mountains. The student life of a KazNU student will be wonderful. I came to this university with these thoughts and was convinced of this in practice.

In conclusion, KazNU is not just a university to me; it is a second home where I have forged lifelong friendships, cultivated invaluable skills, and embarked on a journey of self-discovery. It has empowered me to dream big, think critically, and strive for excellence in everything I do. As I continue my academic journey at KazNU, I am confident that it will

continue to shape me into a well-rounded individual prepared to tackle the challenges of the future. That's why I love my university. I am very happy and never regret that I chose KAZNU and I am honored to be a student at this prestigious university. I advise everyone to enroll in our university.

Әл-Фараби атындағы ҚазҰУ Механика-  
математика факультеті

Актуарлық математика мамандығының 1 курс  
студенті: Ибат Камила Тілекбергенқызы
